

Announcing New 3200-Series Digital Telephones

The Strata CIX product family once again expands to better serve and increase your market. Toshiba is proud to announce a new line of digital telephones compatible with Strata CTX28, CIX/CTX100-S, CIX/CTX100, CIX200 and CIX/CTX670 systems. The 3200-series digital telephone product family also includes a matching Add-On Module, Direct Station Selection console and Tilt Stands. The new 3200-series digital telephones have a new modern hi-tech stylish look with silver bezel around the LCD that looks similar to our 2000-series IP telephones. They offer the same flexibility and functionality as the 3000-series digital telephones. The 3200-series digital telephones are available in charcoal gray only. Ash white 3200-series digital telephones are not available.

The 3200-series telephones are compatible with existing 3000-series telephones headset adaptor, tilt stands, Speaker Off-Hook-Call Announce, and desktop PC interface modules. A matching Digital DSS Console and Add-On Module round out the new digital telephone family.

	DKT3220-SD 20-button with 2-line x 24- character LCD		DKT3214-SDL 14-button with adjustable 8-line x 24- character LCD
	DKT3210-SD 10-button with 2-line x 24- character LCD		DKT3207-SD 7-button with 2-line x 24- character LCD (CTX28 only)

	DKT3220-S 20-button Digital Speakerphone		DKT3201 Digital Single Line Telephone
	DDSS3260 60-button DSS Console		DKT3210-SD 10-button telephone with DADM3220 20-button Add- On Module
	DKT3210-S 10-Button Digital Speakerphone	At this time, there is no full-duplex speakerphone model in the 3200-series digital telephones. However, the DKT2020-FDSP with RFDM external microphone will remain a part of the Toshiba digital telephone product line to meet the needs of full-duplex speakerphone applications, while supplies last.	

Features

The 3200-series digital telephones support the same Strata CIX/CTX features and hardware options as the 3000-series digital telephones. This represents a very powerful feature set, as compared to many competitors' digital telephones which don't support important telephone features such as:

- Busy Lamp Field (BLF) display of station status.
- Background Music through telephone speakers.
- Paging over telephone speakers.
- Off-hook Call Announce over telephone handset or speaker (optional)
- Supports Add-on Module and Direct Station Selection consoles
- Speakerphone operation

Hardware Options

The 3200-series digital telephones are compatible with the same optional interfaces used on the 3000-series digital telephones

- Optional Headset adaptor (BHEU)
- Optional Speaker OCA interface (BVSU)
- Optional Desktop OAI interface (BPCI)
- Optional Tilt-Stands (BTSD & BTSA)

Compatibility

The 3200-series digital telephones are supported by Strata CTX28, CIX/CTX100-S, CIX/CTX100, CIX200 and CIX/CTX670 systems with any software release. The existing digital station cards support all 3200-series digital telephones except the DKT3207-SD which is only supported by CTX28.

Pricing

The 3200-series telephones list price is the same as the 3000-series telephones. The 3200-series telephones will be included in the next version of CIX Quote.

System Packages

The existing Strata CIX System Package part numbers and configurations will remain the same, but will now contain 3200 series digital telephones.

The CTX28 charcoal gray telephone packages will now contain 3200 series charcoal gray telephones. The CTX28 white telephone packages will contain 3000 series, ash white telephones.

Documentation

The following Strata CIX documentation is now available on Internet FYI for the 3200-series digital telephones:

Strata DKT/IPT User Guide and Quick Reference Guide have been revised to include the 3200-series digital telephones (available electronically on FYI).

Availability

The new charcoal gray 3200-series digital telephones will be available for ordering and shipping Thursday, November 17, 2005.

The 3000-series ash white digital telephones will continue to be available.

There is a limited number of DKT3000 series, charcoal gray digital telephones that will continue to be available while inventory supplies last.
