

Meeting Only IPedge App-Server

IPedge systems running 1.7 software requiring Toshiba's Meeting feature and Strata CIX systems with Application Servers running 1.7 software will require a Meeting Application Server on a separate physical server.

For customers that previously purchased Meeting and are currently on SUS a 50% discount on the purchase of a physical Meeting application server is available. The Meeting licenses will transfer to the Meeting server for free (contact Toshiba's TSD Customer Service for this transfer).

The Meeting application on the IPedge app-server platform is for IPedge 1.7 systems and Strata CIX systems. Meeting is web-based, so conferences can be setup from anywhere, view conference participation during a call, and share a desktop screen.

Meeting Only Application Server

The Meeting Only Application Server is based on a Dell® 9020m server using IPedge 1.6.2.208 software. The Meeting Only Application Server is strictly for Meeting and does not support IPedge Messaging, it cannot be upgraded to an IPedge system.

IPedge Meeting Application server capacity is:	Item	IPedge	Strata CIX
	Audio channels	36	24
	Conference Recording	8	8
	Video Channels	36	24
	Web Collaboration	36	24

A Meeting server requires the server hardware and a software bundle. Order the server and one software bundle per meeting user. The number of software bundle is the number of simultaneous meeting users.

- **I-ASEPM-VS** – Meeting Server hardware. (Order this plus one I-MT-A-IPE or I-MT-A-CIX™)
In addition to the I-ASEPM-VS application server order one of the following for each meeting attendee up to the system maximum of 36 for an IPedge system or 24 for a CIX system.
- **I-MT-A-IPE** – Choose this bundle to connect the Meeting Application Server to an IPedge system. This is a bundle part number which includes:
 - I-MT-A – Meeting Only Application Server software (to be applied to the Meeting Server)
 - I-CP-USR – IPedge system user license (to be applied to the IPedge system)
- **I-MT-A-CIX** – Choose this bundle to connect the Meeting Application Server to a Strata CIX system. This is a bundle part number which includes:
 - I-MT-A – Meeting Only Application Server software (to be applied to the Meeting Server)
 - LIC-CIX-IP PORT – Strata CIX system port license (to be applied to the Strata CIX system)
Strata CIX systems require MIPU ports to support Meeting on the Application Server.

Additional Licenses

Any additional Meeting licenses purchased for Audio Recording, Video, Web Collaboration, and Web plus Video must be applied to the Meeting Only Application Server.

- **I-MT-RCD** – Recording License
- **I-MT-V** – Video Conference License
- **I-MT-W** – Web Collaboration Channel License
- **I-MT-WV** – Web plus Video Channel License

Description

Meeting allows participants to dial into a single conference or any combination of conferences such as three conferences of eight participants.

Conferences can be scheduled, with a guaranteed number of ports or can be on-demand, meaning they can be dialed into and used at any time within the constraints of the available resources.

The Meeting application connects to IPedge systems through SIP based extensions. One SIP port is required for each audio port on the Meeting app-server.

The Meeting application connects to Strata CIX systems through SIP based extensions configured on GIPU or MIPU cards. One GIPU/MIPU port is required for each audio port on the Meeting app-server.

Features

The Meeting feature has many useful functions and advantages:

Audio Conference Features

- **Reservation-less and Scheduled Meet-me Conferencing** – allows for quick start-up of conferences and easy scheduling.
- **Web User Interface for Moderators** – enables moderators to schedule conferences.
- **Conference View** – shows moderators the participants that are in their conference and enables the management of individual participants. Participants can be muted, disconnected, or transferred to another conference for a side bar conversation.
- **Telephone Portal for Moderator and Participants** – enables moderators and participants to exercise in-conference controls via DTMF.
- **Outlook Calendar Integration** – allows meetings to be easily scheduled and invitations distributed to all participants.
- **Web-based Reporting** – enables managers to view the impact of audio conferences and web collaboration sessions in their business.
- **Moderator and Participants Codes** – adds security and control to who can manage and participate in conferences.
- **Exit and Entry Tone** – lets participants know when people are entering and leaving conferences in order to avoid surprises.
- **Audio Recording Capabilities** – enables audio conferences to be recorded for later playback or archived for record retention.

- **Flexible Configuration from 8 to 36 ports** – provides cost-effective small conferencing system for the SMB with room to grow and expand. Configuration of 8 to 24 ports on Strata CIX systems.

Web Collaboration Features

- **Web based Desktop Sharing** – enables moderators to share documents, presentations and conversations in the meeting.
- **Web User Interface for Participants** – enables participants to join a web conference from any computer and does not require a dedicated application to be installed.
- **Chat** – enables participants to exchange text messages to the group or individually while in a conference.

Hardware (9020m)

The Dell 9020m is a powerful micro desk top computer. The 9020m is the same hardware used for the IPedge EP server

Positioning Statement and Selling Advantages

This app-server is used for Strata CIX systems using an IPedge App-Server and IPedge 1.7 systems requiring the Meeting feature.

IPedge server release 1.7.2 will have a meet-me conference bridge built-in.

This app-sever will (in future) be used as an option for video conference and web collaboration.

Compatibility

Meeting is compatible with all IPedge systems running 1.7 software and Strata CIX systems with software version 5.0 and higher. IPedge meeting app-server runs IPedge 1.6.2 software.

Warranty, Maintenance and Support

Toshiba provides one year of software maintenance (SUS) on Meeting software which includes software upgrades and support. The 9020m is covered by Dell's three-year basic warranty. Toshiba offers additional Meeting App-Server warranty coverage. Additional SUS is also available.

Documentation

The Meeting User Guide is available for download on Internet FYI.
